

Japanese Language Class

We believe that initial care is one of the most important aspects for school from overseas with different languages and cultures. Learning Japanese language arts before and after entering school leads students to feel safe and have confidence. If the students cannot understand studying any subject while staying in Japan for a longtime, concentrated Japanese learning will be the best way to understand the subjects. At "Gururitto", we have our own classroom "Gururitto Japanese Language Class for Children" and also another classroom "Ota Japanese Language Class for Children" that is entrusted by Global City Ota Cooperation Association(GOCA). We are providing support to students according to their backgrounds and situations.
